EXAMINER'S AMENDMENT/COMMENT

Reasons for Allowance

Applicant's argument with regarding to the rejection of claims 1-26 has been persuaded. The teaching relied upon by the Examiner in the prior art of record to U.S. Patent 5,818,482 to Ohta does suggest that land block (43) being encircled with the common ink channel (44). However, regions (17) of both the cavity plate and the manifold are made up of the pressure chamber instead of the pressure chamber being provided in the cavity plate.

Regarding a manifold channel formed to be a loop channel, the common ink channel (44) described by Ohta is being provided in the cavity plate which is not constituted the manifold channel as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
